Team Augmentation Checklist

Augmenting staff to increase your company's overall capacity and expertise can beneficial at any stage. Use this checklist to identify the 6 most impactful aspects for ensuring success.

- ☐ Understand each individual's skillset and skill level

- ☐ Provide roles and reasons for bringing on new team members.

- ☐ Have your onboarding processes and documentation ready to go and tested before augmentation starts.

- ☐ Ensure the whole team knows what you'd like to improve in your software development processes.

- ☐ Make the new team aware of any junior members of your team.

- ☐ Treat everyone the same and make the new members feel at home.
